**Investigative
Sites**

The goal of DaVita Clinical Research (DCR) is to integrate research in DaVita[®] dialysis centers and support innovation in End Stage Renal Disease (ESRD)

**What are the
fundamental
services of
DCR?**

- Support integration of clinical research into dialysis center operations
- Facilitate effective communication and collaboration between dialysis center staff and study teams
- Enhance the experience for all parties involved in clinical research
- Achieve our top priorities: safety and continuity of care for patients

- Full Service Network
- Protocol Consultation
- Real World Population Analysis
- Site Feasibility
- Centralized Budget Development
- Regulatory Document Collection
- IRB Submission
- Site Contracting

**Additional
services:**

THE UNIQUE CAPABILITY OF A RENAL RESEARCH ORGANIZATION WITHIN AN INTEGRATED HEALTHCARE PROVIDER.
